Vol. XXIV, No. 12.

Northville, Mich., Thursday, November 3, 1892.

\$1.00 per year, in advance.

IT'S FORWARD AGAIN.

Another Enterprise Is Added to Northville's Fame.

THE NEW SAVINGS BANK.

Its Organization Was Completed Last Week.

Two weeks ago we noticed the prospective organization of a savings bank in our village, and knowing as we did, the capabilities of the instigators, and the well known ability of the subscribers, we had no doubt of the successful outcome of the proposition. The stockholders met Thursday night of last week, completed the organization and elected the following officers:

Directors:

J. M. Swift.
L. W. Simmons.
F. N. Clark.
C. J. Sprague.
W. P. Yerkes.
A. R. Chapman.
J. M. Simmons.

Officers:

President—J. M. Swift.
Vice-Pres.—W. P. Yerkes.
Cashier—L. A. Babbitt.

The new institution will be known as The First State & Savings Bank of Northville, and will do commercial as well as savings business. The cash capital is \$25,000. The stockholders are among Northville's best and most solid business men and retired wealthy farmers. R. Chapman is a wealthy farmer. Walled Lake physician and Mr. Sprague is a prosperous Farmington farmer. There is not the least particle of a reason why the new venture should not be a decided success. The directors are now looking for a suitable building which they can either buy, or lease for a term of years, and soon as one can be decided upon it will be at once fitted in shape and business commenced. They hope to be able to turn over their "Bank Open" shingle by Dec. 1.

EIGHTH CONTEST.

Livonia People Will Have the Next One.

The eighth silver medal contest will occur at Livonia tonight. The contestants are from Northville and there will be a well pleased crowd in attendance at the Livonia school house.

ANOTHER CONFLAGRATION.

D. W. Packard's House and Contents Destroyed Sunday.

De Witt Packard's home two miles south of here was completely destroyed by fire last Sunday afternoon with almost the entire contents. Mrs. Packard was lying on a couch, and smelling something burning in an adjoining room went to the door to ascertain what it was. She found the carpet on fire and the room black with smoke. She ran out of doors and rang the farm bell for assistance, but it arrived too late to be of any use. The house was soon a mass of seething flames, devouring everything in its way with a seemingly ravenous hunger that was magnificently awful.

Had Mrs. Packard had the presence of mind to have dashed a pail of water on the flames when first discovered the home might have been saved. We are informed that the other members of the family were all from home when the fire broke out. The house was lightly insured.

Mr. Packard and family are well known in Northville where their misfortune is learned of with much regret.

A MRS. HARRISON MEMORIAL.

The Methodist Pastor Pays Her a Fitting Tribute.

At the memorial services in the M. E. Church last Sunday morning, Rev. P. Ross Parrish spoke about as follows: "Although the whole world unite in condolence over the loss of the wife of the president of our nation; though the potentates have expressed their grief and the press has been filled with the sad tidings, let us not forget that fitting expression of our sympathy is but the quickener of right feeling in us and in others. Some think that pity and sympathy, when genuine, is unspoken; silence may as well be criminal whether in high or low estate. Deep sentiments are beyond speech, but the very attempt to voice them will prove how inadequate are our words and be successful, simply as adding 'amen' of our personal interest.

We are glad to see the banners of our nation lowered, which would not otherwise bow to the proudest nation on earth.

In going from the old home at Indianapolis to the National Capitol, the affairs of the household remained very much the same. The household goods were removed. Family prayers and the order of home went on, in the main, uninterrupted.

We admire the abnegation of our president for his wife. Not because he did more than his duty, or more than any other husband or brother would do, but because it is conspicuous and stands out before the nation; and as we admire his noble traits of character in the home we admire them in every home. Honor and personal eminence sink into nothingness beside the deep sense of a loved one lost. The president's greatest comfort came from the dying wife herself. They believed in prayer and in the promises of the Bible with unquestionable faith. Mrs. Harrison approaches death without any fear. She is resigned to her fate and endeavors to make the president so. She died with the flowers and leaves which she loved so well.

The funeral services were simple and beautiful, typical of her genuine religion. Religion of heart and life must be essentially one. Wherefore comfort one another with these words' was the text from which the sermon was preached.

The hundreds and thousands now bow to the event. We join our sympathy with the grief-stricken magistrate. I trust it is sincere. Personal views do not constitute the main feelings. Whatever our party relations, they are forgotten at the time. In the loss of mother, wife and daughter, we weep with those who weep. We meet not to laud and glorify her, but to commend her noble traits to every woman.

She, holding the second place known to sovereigns of this world, lived and died in the faith of our own christianity, which brings faith and comfort to the widow in yonder little hotel, saying, 'Lord Jesus, receive my spirit.'

The speaker's Columbian remarks were very pronounced and highly interesting. In a most realistic manner he followed the life of Columbus from the very cradle to the time of his landing at San Salvador. 'Columbus,' says Dr. Parrish, 'was a man of destiny, picked from the humbler walks of life to perform the greatest event in the world's history. A work which initially revolutionized christianity and made this great America, king of nations.'

Council Proceedings.

An adjourned special meeting of the council was held Oct. 28, 1892.

President pro tem J. M. Swift in the chair.

Minutes of the last meeting were read and approved.

The water commissioners reported that they have secured 970 feet of iron pipe and on motion they were instructed to investigate the matter of buying more iron pipe and report at the next meeting.

Motion carried that the water commissioners consider the matter of paving the reservoir complete to the top. Council Adjourned. Clerk.

DR. BENNETT.

At the Macomber House Next Wednesday, Nov. 9.

Mrs. Dan Shaffer, one of the old residents in Northville, used to be the greatest invalid. She had everything human flesh was heir to and was ready to give up the ghost five years ago. Uterine trouble; stomachic difficulties; heart weakness; the worst form of Catarrh and Bronchitis. She had been to all home talent, and even to Ann Arbor. They sent her home saying "nothing can be done," and there she was on the bed with the assurance she might die anywhere from three days of three months.

She finally heard of Dr. Bennett, sent for him to come and see her. New hope sprung up when she heard him say: "I will get the power right and then everything else will soon normal." She asked her physician what he thought of it and he said "He will never do it."

In short he did do it and she remains so. Just as well as ever and no stomach to be crowded full of drugs to make them do it. The doctor stands astonished at the results.

"How was this done?" He removed the fever and thereby removed the cause of this disturbance.

He keeps coming and doing these things and curing such cases all the time. Better go and learn more about his work for he is ahead of general practice of today. Remember at the Macomber house next week Wednesday.

AT THE TABERNACLE.

A SERMON APPROPRIATE TO THE FALLING OF LEAVES.

The Text: "The Stork in the Heaven Knoweth Her Appointed Time; and the Turtle, and the Crane, and the Swallow Observe the Time of Their Coming; but My People Know Not."

BROOKLYN, N. Y., Oct. 20, 1892.—The flutter of bright colored leaves which every wind blows from the trees in the avenues around the Tabernacle, reminded the thousands who entered its doors this morning, that winter was approaching. Dr. Talmage, with his usual tact, turned the impression to account in his sermon, which was on the text, Jeremiah 8: "The stork in the heaven knoweth her appointed time; and the turtle, and the crane, and the swallow observe the time of their coming; but my people know not the judgment of the Lord."

When God would set fast a beautiful thought, he plants it in a tree. When he would put it afloat, he fashions it into a fish. When he would have it glide the air, he moulds it into a bird. My text speaks of four birds of beautiful instinct—the stork, of such strong affection that it is allowed familiarly to come in Holland and Germany, and build its nest over the doorway; the sweet dispositioned turtle-dove, mingling in color white and black, and brown, and ash, and chestnut; the crane, with voice like the clang of a trumpet; the swallow, swift as a dart shot out of the bow of heaven, falling, mounting, alighting, sailing—four birds started by the prophet twenty-five centuries ago, yet flying on through the ages, with rousing truth under glossy wing and in the clutch of stout claw. I suppose it may have been this very season of the year—autumn—and the prophet out-of-doors, thinking of the impetuosity of the people of his day, hears a great cry over-head.

If you were in the field to-day, in the clump of trees at the corner of the field, you would see a "convention of birds," noisy as the American Congress the last night before adjournment, or as the English Parliament when some unfortunate member proposes economy in the Queen's household—a convention of birds all talking at once, moving and passing resolutions on the subject of migration, some proposing to go to-morrow, some moving that they go to Brazil, some to Florida, some to the table-lands of Mexico, but all unanimous in the fact that they must go soon; for they have marching orders from the Lord, written on the first white sheet of the frost, and in the pictorial of the changing leaves. There is not a belted kingfisher, or a chaffinch, or a fire-breasted wren, or a plover, or a red-legged partridge, but expects to spend the winter at the South, for the apartments have already been ordered for them in South America, or in Africa; and after thousands of miles of flight, they will stop in the very tree where they spent last January. Farewell, bright plumage! Until spring weather, away! Fly on, great band of heavenly musicians! Strew the continents with music, and whether from Northern fields or Carolina swamps, or Brazilian groves, men see your wings or hear your voice, may they bethink themselves of the solemn words of the text: "The stork in the heaven knoweth her appointed times; and the turtle and the crane and the swallow observe the time of their coming; but my people know not the judgment of the Lord."

It is a good sign when you hear a workman whistle. It is a better sign when you hear him hum a roundelay. It is a still better sign when you hear him sing the words of Isaac Watts or Charles Wesley: A violin chorded and strung, if something accidentally strike it, makes music, and I suppose there is such a thing as having our hearts so attuned by divine grace, that even the rough collisions of life will make a heavenly vibration. I do not believe that the power of Christian song has yet been fully tried. I believe that if you could roll the "Old Hundred" doxology through Wall Street, it would put an end to any financial disturbance! I believe that the discords, and the sorrows, and the sins of the world are to be swept out by heaven-born hallelujahs. Some one asked Haydn, the celebrated musician, why he always composed such cheerful music. "Why," he said, "I can't do otherwise. When I think of God, my soul is so full of joy that the notes leap and dance from my pen." I wish we might all exult melodiously before the Lord. With God for our Father, and Christ for our Saviour, and heaven for our home, and angels for future companions, and eternity for a lifetime, we should strike all the notes of joy. Going through the wilderness of this world, let us remember that we are on the way to the summery clime of heaven, and from the migratory populations flying through this autumnal air learn always to keep singing.

Children of the heavenly King: As ye journey, sweetly sing: Sing your savior's worthy praise, Glorious in his words and ways.

Ye are travelling home to God: In the way your fathers tread: They are happy now, and we Soon their happy places shall see.

The Church of God never will be a triumphant church until it becomes a singing church.

You tell me that Paul went up to the tiptop of the Alps of Christian attainment. Then I tell you that the stork and crane have found above the Alps plenty of room for free flying. We go out and we conquer our temptations by the grace of God, and lie down. On the morrow, those temptations rally themselves and attack us, and by the grace of God we defeat them again; but, staying all the time in the old encampment, we have the

same old battles to fight over. Why not whip out our temptations, and then forward march, making one raid through the enemy's country, stopping not until we break ranks after the last victory? Do, my brethren, let us have some novelty of combat, at any rate, by changing, by going on; by making advancement, trading off our stale prayers about sins we ought to have quit long ago, going on toward a higher state of Christian character, and routing out sins that we have never thought of yet. The fact is, if the church of God—if we as individuals, made rapid advancement in the Christian life, these stereotyped prayers we have been making for ten or fifteen years would be as inappropriate to us as the shoes, and the hats, and the coats we wore ten or fifteen years ago. Oh for a higher flight in the Christian life, the stork and the crane in their migration teaching us the lesson:

Dear Lord, and shall we ever live, At this poor dying time, Our love so faint, so cold to thee, And thine to us so great?

Again, I remark that the birds of the air are wiser than we, because they know when to start. If you should go out now and shout, "Stop, storks and cranes, don't be in a hurry!" they would say, "No, we cannot stop; last night we heard the roaring in the woods bidding us away, and the shrill flute of the north wind has sounded the retreat. We must go. We must go." So they gather themselves into companies, and turning not aside for storm or mountain top or shock of musketry, over land and sea, straight as an arrow to the mark they go. And if you come out this morning with a sack of corn and throw it in the fields and try to get them to stop, they are so far up they would hardly see it. They are on their way south. You could not stop them. Oh that we were as wise about the best time to start for God and heaven! We say, "Wait until it is a little later in the season of mercy. Wait until some of these green leaves of hope are all dried up and have been scattered. Wait until next year." After a while we start, and it is too late; and we perish in the way when God's wrath is kindled but a little. There are, you know, exceptional cases where birds have started too late, and in the morning you have found them dead on the snow. And there are those who have perished half-way between the world and Christ. They waited until the last sickness, when the mind was gone, or they were on the express train going at forty miles an hour, and they came to the bridge and the "draw" was up; and they went down. How long to repent and pray? Two seconds!—Two seconds! To do the work of a lifetime and to prepare for the vast eternity in two seconds! I was reading, of an entertainment given in a King's court, and there were musicians there, with elaborate pieces of music after a while Mozart came and began to play, and he had a blank piece of paper before him, and the King familiarly looked over his shoulder, and said, "What are you playing? I see no music before you." And Mozart put his hand on his brow, as much as to say, "I am improvising." It was very well in him, but oh, my friends, we cannot extemporize heaven. If we do not get prepared in this world, we will never take part in the orchestral harmonies of the saved. Oh that we were as wise as the crane and the stork, flying away, flying away from the tempter.

You may have noticed that when the chaffinch or the stork or the crane starts on its migration, it calls all those of its kind to come, too. The tree-tops are full of chirp and whistle and carol and the long roll-call. The bird does not start off alone. It gathers all of its kind. G that you might be as wise in this migration to heaven, and that you might gather all your families and your friends with you; I would that Hannah might take Samuel by the hand, and Abraham might take Isaac, and Hagar might take Ishmael.

Start for heaven yourself, and take your children with you. Come then and all thy house into the ark. Tell your little ones that there are realms of balmy and sweetness for all those who fly in the right direction. Swifter than eagle's stroke, put out for heaven. Like the crane or the stork, stop not night nor day until you find the right place for stopping.

To-day the Saviour calls. Ye wanderers come. O ye benighted souls, Why longer roam? The Spirit calls to-day. O, give him no away. 'Tis mercy's hour.

A peculiar insurance company has got into operation in Denmark. Young girls may enroll themselves, and by paying a small sum periodically become entitled to a regular weekly allowance from the company if they remain unmarried at and after the age of 40. The fact that marriage forfeits all claims is expected to assure the success of the scheme, not to speak of the tardiness with which many of the members will announce their arrival at the age of 40.

The house in which Marshal Bernadotte, grandfather of the present King of Sweden, was born was recently offered for sale. It is situated in Pau and is a one-story building, with three windows looking out on the street. JACOBS OIL

CURES SCIATICA Back Aches and Neuralgia. IT HAS NO EQUAL.

Ask your doctor what happens to cod-liver oil when it gets inside of you. He will say it is shaken and broken up into tiny drops, becomes an emulsion; there are other changes, but this is the first.

He will tell you also that it is economy to take the oil broken up, as it is in Scott's Emulsion, rather than burden yourself with this work. You skip the taste too.

Let us send you an interesting book on CAREFUL LIVING; free.

Scott & Bowen, Chemists, 132 South 5th Avenue, New York.

FRESH AIR. A great many people are cranks in regard to fresh air. The late Walt Whitman used to parade up and down the streets of New York City with his shirt open at the breast so that the air could have free access to his system. Now the skin plays an important part in the animal economy and when the old air has too great access to the skin of the body it shrinks and the many pores that are in the skin and that act as drainage tubes, suddenly close. When this is done it is only necessary to incite the kidneys to action, to relieve the lungs. The patient is thus cured and in so doing the blood is thrown upon the kidneys and when they break down from overwork upon the lungs. This is why every old man has a cough as well as the lungs. The only thing possible is to stimulate the circulation so that the skin resumes its function. When this is done it is only necessary to incite the kidneys to action, to relieve the lungs. "Seeing is Believing."

And a good lamp must be simple; when it is not simple it is not good. Simple, Beautiful, Good - these words mean much, but to see "The Rochester" will impress the truth more forcibly. All metal, tough and seamless, and made in three pieces only, it is absolutely safe and unbreakable. Like Aladdin's of old, it is indeed a "wonderful lamp," for its marvelous light is purer and brighter than gas light, softer than electric light and more cheerful than either.

Look for this stamp - THE ROCHESTER. If the lamp dealer has't the genuine Rochester, and the style you want, send to us for our new illustrated catalogue and we will send you a lamp safely by express - your choice of over 2,000 varieties from the Largest Lamp Store in the World.

The Farmington schools are preparing for a lecture course for the coming winter and judging by the talent already secured it will be a series of considerable merit.

Had our water works been completed, as they should have been, both the dwellings which burned Sunday morning could have been saved. Someone should be held responsible for the delay in their completion.

Plymouth Mail.

We shall have more to say next week about cleaning out the mill pond. The work is just rye now and it's really too bad that some definite action cannot be had. We believe one more hostile by the committee would accomplish it.

The road-master of the F. & P. M. railroad company was down here last week getting pointers on the workings of the Northville U. S. fish station with a view of putting in a small hatchery along the company's property near Ludington where they have some trout streams.

All the vitrified pipe in the low places, some 5,000 feet, is to come up and iron pipe will be laid in its place. President Amble in behalf of the water board recommended this before the council Tuesday night and they told him to go ahead. Mr. Amble thinks this will fix it alright.

The cleaning out of the mill pond will be abandoned, for the present at least. The committee think it could be accomplished in good shape for a comparative slight expenditure, but the council think they have about all they can attend to just now in the completion of the water works system.

In the clearing out of this much talked of mill pond, it seemed as if at this time the millennium was reached and the riddle solved. Apparently we were on the very verge of the solution of a gigantic problem which would have fairly revolutionized the scenic grandeur of our famous village and forever purged from her lofty domain the one blemish which alone was left to mar her beauty and touch our pride. If we were so near the goal, it is to be deeply regretted that it is not reached. In the undertaking, or the investigation, all honor to Mr. Gillispie who kept the pond drained for two or three days, in the meantime running his mill by steam, to assist the investigators in their project. Not only this but Mr. Gillispie offered to render all the assistance in his power, in addition to keeping the pond drained for the necessary time, be it one or a dozen weeks. To the committee, who waded and waded through the debris for some hours, punching a stick down here or kicking out an armful of muck there, in the pursuit of knowledge of the unknown and semi-mysterious depths, to them we say, we can safely offer the entire village's vote of thanks. The end is not yet. The good work now done will certainly bear fruit and before another year shall have come and gone, before the ice and snow for a second time shall have covered its mysteries from the eyes of man, a bright sparkling sheet of water will attract the eye of the passer by as it now occasionally, in the glad summer days, attracts his nose.

On Monday night, a very enjoyable Halloween party was given to about twelve young ladies by Mrs. Belle Randolph Long. Fortune-telling, games and dancing, interested the guests until after midnight.

We do not mind so much an exchange purloining items from the Record and either crediting to "Exchanges", or giving no credit at all, but when a whole item is boldly clipped from this paper and credited to papers of neighboring villages, as the Ann Arbor Courier and Farmington Enterprise have both lately done, we enter a decided protest.

The manager of the opera house is now negotiating with the famous Labadie opera company to play here the last of November or the first of December. This company is one of the best on the road and draws large houses in such cities as Kalamazoo, Benton Harbor, Ypsilanti and the like. The Benton Harbor daily of Oct. 22, speaks very highly of their work there, and it is safe to say they will be here soon.

Orange Butler tells us that he heard a fellow say, presumably at the hotel, that he was going to lick the editor once and then run. That's alright "fellows", when we're wanted we won't be found loafing around the town, but right after our business, ten hours a day, for six days in a week, publishing one of the best newspapers in the good old state of Michigan, which can be had for the small sum of \$1 per year, or three months to new subscribers for 25 cents, cash in advance. Now is the time subscribe.

The management of the opera house has made arrangements with the Northville elocution class for an entertainment to be given Saturday evening Nov. 19th. This class has given entertainments at South Lyon, Farmington, Franklin and other places, and the papers and people of those towns have been loud in their praises of the entertainment. The class is composed of well known and popular Northville ladies and gentlemen and are elocutionists of considerable ability. The opera house will probably be newly seated in the gallery, and a number new seats placed down stairs, that the large crowds may be accommodated. Full announcements will be made next week.

Music lessons. Piano or organ. Lessons given at your own house or at my home, to suit scholars convenience. Three lessons for \$1. Satisfaction guaranteed.

Council Proceedings.

A regular meeting of the council was held Nov. 1st 1892.

President pro-tem, J. M. Swift in the chair.

Present, Trustees Miller, Rayson, Vanille, Johnson, Tingham.

The following bills were allowed and ordered paid:

Globe Furn. Co. electric lights \$75.48
P. B. Barley, care of engine, 10.50
Lansing Iron & Engine works, 3,000
A petition to extend a drain on Center street was referred to the street committee.

The water works contractors were requested to restore the grade of the streets.

The board of water commissioners report that they can secure 3,000 feet of iron pipe at a total cost of \$2,500 including that already purchased and recommend its purchase.

On motion the water commissioners were instructed to purchase said iron pipe.

The water commissioners report that the Lansing Iron & Engine Wks would deliver and lay the iron pipe for 26 1/2 cts. per foot.

On motion the board of water commissioners was instructed to contract for the laying of the iron pipe.

Council Adjourned.
C. A. DOWNER, Clerk.

Mrs. Annie Ward Foster's classes in Dancing and Delsarte will open Thursday, Nov. 10, at the rink. All who wish to be taught correctly will do well to avail themselves of this most excellent opportunity as Mrs. Foster's prestige as an instructor is well established; having taught at the Military Academy at Orchard Lake, at Bay Port last summer and she now has classes in Saginaw, Muskegon, Detroit and Ann Arbor. Terms \$6 for 12 lessons, one half in advance.

A COMMUNICATION.

Pontiac Mich., Oct. 31 1892.
Editor Northville Record.

My attention was called to a statement in your Nov. 1st correspondence that the case against the township board of Nov. was carried on for political purposes, and is now dropped, and those responsible for it should pay the expenses.

The case has not been dropped. If necessary to secure fair and pure elections; money should not be considered, nor the convenience of individuals. There is no question in my mind but what the election law was violated in Nov.

It is claimed the violation was done innocently and ignorantly so that it is wholly a question of intention on the part of the board. For this reason the members of the board have been as little expense and trouble as possible and proceed with the case. I have said that if they shall obey the law fully in the future I might be satisfied their intentions were good and that I presumed as no one would then wish me to press the case to a trial and it is from this statement your correspondent probably made the item. But the case is still in court and if they shall not comply with the law, it would clearly show they not only intended to defraud last spring, but intend to continue it in the future and that in that event the trial ought to proceed, at least against such ones as plan and carry out the wrong.

Very Respectfully
Geo. W. SMITH, Prosecuting Atty.
Oakland County.

Either the item in our Nov. 1st correspondence of last week to which Mr. Smith refers to has not been seen by him at all, or it has been misrepresented to him, or he has intentionally misquoted its construction. First, our correspondent, who by the way is a gentleman of strict integrity and of highest respectability, did not say "the case had been dropped," but said it was so announced. The correspondent did not say it had been "carried on for political purposes" but said that apparently such was the case, and if so, those who had part in it should foot the cost. E. D.]

Stark and Harding can suit you in Fresh and Salt meats.

INTERESTING INCIDENTS IN THE TWO PENINSULAS.

A Despondent Young Man Suicides in a Peculiar Manner at Adrian—Typhoid Epidemic.

A Well-Clothed Wait.

A biggy was driven up in front of the residence of S. H. Opykko, at Jackson, and after stopping a moment turned, and was rapidly driven away. A few minutes later one of the occupants of the house came in, and on the doorstep found a 2-month-old child and a valise containing a large and elegant wardrobe, including not only clothing made up but cloth for other clothing. In the basket with the child was this: "Take, the little darling, it is yours. It has no name." The letter is well written on fine paper, and there is every indication that the child came of wealthy parents. As yet no sleuth has been found. Mrs. Opykko says she will keep it.

Shielded with his Necktie.

Andrew J. Schlemmer, an ex-postal clerk, committed suicide in his room at Adrian by putting a thin black necktie around his neck and fastening it to the upper door hinge. He lost his wife over a year ago and has been acting strangely ever since and was for a time considered crazy. For several days he had been busy assorting his papers and preparing for the deed. He was discovered by his mother before the body became cold but medical aid was unable to restore him. He had \$1,000 insurance on his life and nearly as much more in the bank.

Child Burned to Death.

William Burns' bright little 4-year-old daughter Gerie was playing with matches at her home on "Crow Island," near Saginaw, when she set fire to her clothing. The little was alone in the house at the time, and in her terrible agony endeavored to fight the flames the best way she could, finally rushing outside screaming "fire" and running around in a circle. Neighbors came to her aid and extinguished the flames, but not before the child had received such injuries that she died in awful agony.

A Narrow Escape from Watery Graves.

The schooner Yonder, bound for Milwaukee, returned to Holland after a desperate struggle with northwest gales. The water washed over her bow until she became so listed that the water ran through her hatches and she was completely filled. Only the factory staves in the hold saved her from sinking. The crew suffered intensely, but were finally able to bring their water-tight boat into the harbor at Holland.

Parson Arney Quits the Race Course.

Parson Arney addressed an immense audience at the M. E. church at Three Rivers. He has decided to devote himself solely to the ministry in the future. His mother, who is the oldest member of the church and two married sisters are active members of the Three Rivers church. The parson made many good hits in regard to the publicity given to his doings on the turf the past year.

Typhoid Epidemic at Ishpeming.

One hundred and twenty-eight cases of typhoid fever are authoritatively reported in the city of Ishpeming. Deaths are frequent. The system of sewerage now being put in has been the means of tearing up our streets all summer. The city is built on filled-in swamps, and foul water and poisonous gases pervade the place. Severe cold weather is anxiously awaited to end the epidemic.

Round-House Burned.

Fire destroyed the Grand Rapids and Indiana round house and damaged two engines at Kalamazoo, a high wind fanned the flames, and for a time a serious conflagration was threatened by flying sparks. Loss, \$1,500.

Swindling Book Agents have placed many orders in Marquette.

The Lenawee county W. C. T. U. will hold a convention at Ridgeway, Nov. 16 and 17.

H. M. Chapman has moved his foundry and machine shop from Constantine to Marcellus.

W. Lawrence has been appointed postmaster at Beary, vice J. Rattenburg, resigned.

Poultry thieves are getting some big hauls about Dundee. One man sold 100 chickens in one night.

James F. Seely, of Ypsilanti, sold the timber on his farm, some two miles west of Milan, for \$3,000.

The Ypsilanti Savings Bank building was badly damaged by the storm. Part of the slate roof was blown off.

A Crandall, of Corunna, is packing away 1,000 tons of baled hay in a warehouse recently erected for that purpose.

A man named Howe, working on a farm near Richfield, was kicked in the head by a horse and had his skull fractured.

At a special school meeting Albion voted to make additions to its high school building to accommodate 200 scholars.

Two-year-old Willis Parsons, of Decatur, ate up a package of Paris green, but by prompt medical attendance the child's life was saved.

Dundee athletes, after hard struggle, ranked a building a gymnasium. After hiring a trainer, they started out by two boys breaking their arms.

Swedes of Chicago Celebrate the Discovery of America—American Locomotives Beat Items.

Eriksen Honored.

While all the rest of the world has been celebrating the achievements of Columbus the Norwegians of Chicago have been quietly making preparations to honor the memory of their countryman, Leif-Eriksen, who they claim was the real discoverer of the new world in the year 1000. Therefore Norwegians crowded into Scandinavia Hall to listen to song and story and eulogy of their countryman. Many stories and anecdotes in his honor. A street procession of Scandinavian societies preceded the meeting. D. B. Anderson, ex-United States minister to Denmark, delivered the chief oration. Consul Peter Svanoe and Prof. Gustav Storm, of Christiania, also spoke. At night there was another celebration, a grape eating festival in memory of Eriksen's legendary vineyard. Members of the association, which is having a \$3,000 painting of Eriksen made for the World's Fair, were present.

LOCOMOTIVES RACE.

Four Pennsylvania Railroad Engines Make Good Time—American Machines Best.

For the purpose of discovering what style of machine would be best adapted for hauling fast trains by the World's Fair next year, four locomotives of the Pennsylvania railroad recently raced a mile on the Jersey meadows, says a New York dispatch. The engines were from different parts of the system between New York and Pittsburgh. Each engine drew two cars. They started from the terminal station in Jersey City.

"Johnny Bull," English engines, had demonstrated their utility as drawers of heavy trains, but did not show up so well on speed for a mile, as they covered the distance in 63 and 65 seconds respectively. The Schenectady engine did the mile in just 53 seconds, which is equal to 72 miles an hour. This was considered good time, but the Pennsylvania No. 340, made in her own shops, did better, doing the mile in 47 seconds.

Cannot Become an American Citizen.

An interesting decision touching the question of naturalization has been rendered in the city court of Albany, N. Y., on the application of San C. Po, a Burmese, to become a citizen of the United States. Judge Danaher in his decision holds that a native of Burmah, being neither a white alien nor an alien of African nativity or a person of African descent, cannot be naturalized and admitted to become a citizen of the United States.

BIG GRAIN BLOCKADE.

Scarcity of Freight Cars Already Apparent—Shippers Becoming Desperate.

There are 10,000 loaded grain cars in Chicago and there is absolutely no place to unload them. Every elevator is crammed to the eaves, few of the shippers are inclined to pay the rail rate, and a majority of the boats do not care to take grain at any price. The reason for the lack of lake transportation is that every elevator from Toledo to Buffalo seems to be as full as those in Chicago.

Some of the shippers are compelled to hurry their grain forward, but even by rail they meet stumbling blocks. One prominent road refused 250 cars of grain because the shipper wanted it routed over a trunk-line from which no guarantee could be obtained of prompt return of cars.

Baseboard lines from Chicago are beginning to hoard their cars as a miser hoards his gold. If they look every car of the traffic offered they might easily see the time in a few weeks when the cars would be used as storage warehouses on the trunk line side track.

Exactly this state of affairs is coming about in a less degree on western roads. In spite of their best attempts cars are being piled up in Chicago at a rate which will soon make the blockade of last year a very insignificant affair.

Stevenson's Letter.

Adlai E. Stevenson has made public his letter accepting the Democratic nomination for vice-president. He unqualifiedly indorses the position which Grover Cleveland took in his recent letter and then treats briefly of the tariff, money and southern elections questions. On the tariff he says he is in full accord with the national platform, which demands the reform of this system and the adoption in its place of one which will insure equality to all our people. To the money plank he subscribes without reservation or qualification; and the alleged force bill he says is inspired by "a policy which tends to destroy popular representation and the purity of local self government."

New Leader of the U. S. Marine Band.

Professor Fanciulli, of New York, has been notified that he had been appointed leader of the band of the United States Marine Corps at Washington, to succeed John Philip Sousa. He conducted the opera for several seasons in Florence, and 15 years ago accepted an offer to accompany an American family to the United States, where he has since resided. During his residence in this country Mr. Fanciulli has written quite a number of original compositions, among them the grand opera "Prisilla," and a comic opera, "The Sultan, or The Lily of the Mountain."

10 Vessels and 22 Lives Lost.

The bark Selina, owned by McKay & Dicks, of New York, 46 days out from Philadelphia for Greenland put in at St. Johns, N. E., short of water. She got to the mouth of the Omapata river in Greenland, eight miles from her destination, four times, and each time was driven back by contrary winds. Details arriving daily show that the gale was severe. The coast was devastated and 10 vessels are either lost or missing and 23 lives were lost. At Green's Pond the sea unearthed the bodies in two graveyards and they were broken to pieces on the Grand Banks.

One Day's Fatalities.

Three fatal accidents, by which five lives were lost, occurred at Alton, Ill., in one day. A \$10,000,000 BLAZE.

CITY OF MILWAUKEE SUFFERS A SEVERE SCORCHING.

The Center of the City Laid in Ashes by the Fire Flood. Aided by a Fearful Wind—Six Lives Lost.

The Cream City—Milwaukee—has been visited by the greatest conflagration in the northwest since the famous and memorable Chicago fire. An entire section of the city of over one square mile in area is now in ashes.

The fire commenced in the establishment of the Union Oil company, at 265 East Water street. The fire was burning fiercely when the city department reached the scene. Owing to the hurricane that was blowing at 40 miles an hour the men were almost unable to do anything and for any practical results might as well have done nothing.

From East Water street, where the blaze started, the path of the fire was the path of an immense V, the connecting point of the two bars being in the oil establishment, while one bar extended directly east to the lake; the other running to the lake in a southerly direction.

Through immense factories from four to seven stories high, which were supposed to be fireproof, the flames spread with as much ease as through the frame cottages which they attacked further east.

After wiping out the factories and wholesale establishments the fire found easy prey in the scores of blocks filled with frame houses which extends east of Milwaukee street. From these the flames leaped to the freight houses of the Milwaukee, Lake Shore & Western. These caught on the southern end and in a moment were ablaze along their whole length, over two blocks. Adjacent were the freight yards of the same railroads as well as of the Chicago & Northwestern. These yards were filled with hundreds of loaded cars, all of which were quickly consumed.

Then followed the destruction of the gas works and the explosion of the three big storehouses. This with the cutting off of electric wires by the fire left the larger portion of the city in darkness, or what would have been darkness but for the brilliant glare of the demon flames. Over 300 dwellings of poor families were destroyed and they were obliged to spend the night in the best shelter they could find. During the course of the fire a number of barns and large livery stables were burned. These were filled with horses, which were liberated by the police. The horses ran wildly about the streets, and before they could be caught a number of persons were run down and badly injured. The wires of the electric street railways were down and the telephone company's system prostrated.

The firemen exhausted their efforts and battled manfully, but it was impossible to get mastery of the fire fiend which rode on with the violent winds almost directly east, lapping up block after block in such an alarming succession that all efforts of the fire department were almost futile. Telegrams were quickly dispatched to Chicago, Racine and nearer cities for aid, all of which responded promptly, bringing fire engines and men to assist in the dire calamity, but all effort was without avail and the fire only ceased when it had reached its limit of combustibles, at the edge of the lake. The loss is placed at about \$10,000,000. The poor families who lost everything were the worst sufferers.

Just how many lives were lost is not known, but the captain of the life saving station reported that four of his men had been buried beneath a falling wall on Broadway as they were going along the street in the endeavor to lend assistance. Another fireman is known to have been killed and a woman was suffocated to death.

Suffering for Water in Pennsylvania.

The drought, water scarcity and mountain fires have all contributed to a very general alarm which is felt throughout the eastern section of Pennsylvania. This is not merely the usual statement that the water supply is very meager, but now as never before in the Lebanon and Schuylkill valleys there is an actual and impending water famine, a serious condition of things never known of before. In the country districts hundreds of wells are dry in every township and farmers have to go to great distances for the water. The fields which were plowed and sown a month ago are baked hard and dry. The once productive fields seem to be covered with nothing but barren dust and in many instances the seed sown early in September has refused to develop, while farmers are plowing the ground over again.

A Female "Fire Eater."

Miss Cozens, a noted female suffragist, speaking in London at a meeting of the Woman's Emancipation Union, said that women should not go on talking until the crack of doom without getting redress for the injustices under which they suffer. The time had come for them to do something desperate. Woman, she declared, had dynamite at her disposal. This statement was greeted with applause. When subsequently questioned if she was serious in her reference to the use of dynamite, Miss Cozens replied that she was if other means failed.

Choysski the Victor.

In the amphitheatre of the Coney Island Athletic club, New York, "Joe" Choysski, of California, knocked out George Godfrey, of Boston, in 15 rounds. The crowd was too large for comfort and standing room only was to be had by the time the first bout began. Peter Jackson came in just before the bout, and his reception was most hearty.

A large portion of the village of Ste. Anne De Beauport, Quebec, was destroyed by fire. The fire extended from the church to the wharf and in a very short time 15 houses were reduced to ashes, the church and a large new hotel being the only buildings left standing.

CANADA IS TO BLAME.

For the Failure of a Wrecking Treaty Between the Two Countries.

Inquiry was made at the department of state at Washington relative to a statement made from Ottawa that the negotiations between the United States and the Canadian government touching the issue of proclamations providing for reciprocity in wrecking and towing in waters contiguous to each country had so far come to naught and implying that the United States government was to blame. It is learned that the United States government has been ready for a long time past to issue the proclamation, but that the delay has been caused by the failure of the Canadian legislature to act as required in the matter. At least, if any such action has been taken, the department of state here is not officially advised, and so cannot proceed further in the matter.

U. S. Consul Smith in Danger.

Since the police guard has been withdrawn from the United States consulate at Three Rivers, Que., the family of Col. Smith are assailed in various ways when they appear on the street and they fear for their lives. His two daughters were insulted by having potato skins and other rubbish flung out upon them from lanes and alleys by young French Canadians of both sexes.

Horace Greeley Smith, the vice consul's son, was also accosted in the post-office lobby by a number of Frenchmen and insulted and roughly treated, personal violence being offered him.

Col. Smith is confined to his bed, threatened with an attack of pneumonia which has developed from the severe cold he caught the night his windows were broken by some irate Frenchmen, because of the colonel's sanitary report of the city. The manner for the colonel's recall is being pressed.

English Liberals Enraptured.

London cables under the instant admonitions of Sir Andrew Clark, his physician, Gladstone has decided to limit his presence in the house of commons during the coming session. He will attend the sittings only on the days when important measures are under consideration. His deputy in the general leadership of the house will be Sir William Vernon Harcourt, the chancellor of the exchequer.

As there are authentic reports that the eye malady which Sir William is a sufferer from is growing worse, the Liberals are disturbed at the prospect of a disorganized leadership. Mr. Gladstone had a conference with the chief whip of the Liberal party regarding the event of Sir William becoming incapacitated.

Hundreds Starving in London.

London cable: Ireland is not the only part of the British dominions where distress prevails. It is calculated that about 100,000 people in London are at this moment in want of the necessities of life. Steps are already being taken by charitable individuals and associations to minimize the suffering as much as possible during the coming winter. But the task seems to be too great for charity, and it is feared that the poor of London will see one of the most miserable of Christmases. People are offering to work for almost any wages, and able-bodied men may be had for 13 hours a day at 10 shillings, or about \$2.50 a week.

Battle of the Giants.

Mike Queenan, the stock yard giant of Chicago, knocked out Dick Graham, of Brooklyn, in four rounds at Peoria, Ill. The men are giants, Queenan being 6 ft. 2 in. and his opponent two inches taller.
